Ameya Kumthekar (He/Him) **Electrical Engineering**

Vancouver, BC ameyakumthekar@gmail.com | (403) 437 4239 | LinkedIn

TECHNICAL SKILLS

Computer Software/Skills
- C/C++/C#, MATLAB, Python, Git
- SolidWorks & Fusion 360
- FPGA programming with Verilog
- Computational Fluid Dynamics
- Digital Logic and Design

Electrical
- Circuit Design/Analysis
- SMT & THT Soldering
- PCB Design and Proficiency
- Multimeters, Oscilloscope, Signal Generator, Microcontroller, Basic Circuit Tools

Tools & Techniques
- Milling & Drilling
- Band Saw Cutting
- Bench Lathe
- Waterjet & Laser Cutting
- 3-D Printing

EDUCATION

University of British Columbia **Expected Apr 2028**
Bachelor of Applied Science – Electrical Engineering
Relevant Coursework: Electricity, Light and Radiation (97%), Computation in Engineering Design (90%)

TECHNICAL WORK EXPERIENCE

Accurate Projects Inc, Calgary, AB **May 2024 – Aug 2024**
Project Management Intern
- Involved in the project management process for **20** projects for the University of Calgary during my time
- Budgeted UofC's budget to balance and free up money for their expansions and renovations
- Oversaw stakeholder meetings and tracked contractor process to ensure project completion
- Conducted site deficiency reviews to report substantial completion of projects to the university

Top Value Project Experience:
- **ENA Active Learning Space ($1.4M) –** Created bid award summary to award winning contractors the opportunity to work with the university
- **Reeve Theater Floor Replacement ($1.07M) –** Worked with contractors during site walks
- **Math Science Renovation ($687K) –** Requested and analyzed drawings before sending off to contractors for construction

ENGINEERING DESIGN STUDENT TEAMS

SUBC, University of British Columbia **Aug 2024 – Present**
Safety Officer, 3rd in Command
- Oversees and ensures safety of our **50+** engineering student team
- Judges' safety concerns of our team and implement fast – acting solutions to guarantee safety while not affecting efficiency
- Assembled and renew SOPs for safe handling of equipment and keep stock of PPEs for team use

SUBC, University of British Columbia **Aug 2024 – Present**
Electrical Team Member
- Assisted with the design and implementation of an electrical module to read statistics and vitals of the submarine during use using custom **PCB's and Sensor designs**
- Gained proficiency in the usage and implementation of **Nordic Semiconductors**

SUBC, University of British Columbia **Sept 2023 – Present**
Drivetrain and Propulsion Member
- Implemented a direct drive system which led to an 8 times increase in resiliency using SolidWorks FEA
- Researched and analyzed a novel toroidal propeller design with SolidWorks CFD, leading to a strength and propulsion improvement from the year before's propeller
